Fun Cinema

Lucknow

The Fun Cinema in Lucknow is part of the Fun Republic Mall, also designed by Arris Architects. The design approach followed the two main goals of creating a breathtaking atmosphere and optimally utilizing the limited space. A visual vortex came into being with the help of wood surfaces which were broken into facets. Each facet was carefully calculated for maximum space utilization. Complex geometry of surfaces in the hall, along with the material's warmth, result in a noble, comfortable as well as inspiring atmosphere serving as a kind of corridor between the real life of the mall and the fantastic world of the movies.
